certbot auf eos:

```
/usr/bin/certbot renew
```

```
Error output from manual-auth-hook command dns_worker_ipc:
To fritz.ipc.uni-tuebingen.de:admins/usr-local-ipc.git
fa5bf4be..b6d78755 master -> master
From fritz.ipc.uni-tuebingen.de:admins/usr-local-ipc
fa5bf4b..b6d7875 master -> origin/master
/bin/ls: cannot access '/usr/local/ipc/named/backup/h190724-083405.sql': No such file or directory
Everything up-to-date
fatal: Unable to create '/usr/local/ipc/.git/refs/remotes/origin/master.lock': File exists
```

```
If no other git process is currently running, this probably means a
git process crashed in this repository earlier. Make sure no other git
process is running and remove the file manually to continue.
/bin/ls: cannot access /usr/local/ipc/named/backup/h190724-083416.sql: No such file or directory
/bin/cp: cannot stat `/var/lib/named/etc/named.conf': No such file or directory
Everything up-to-date
```

```
ToDo - dns_worker_ipc_cleanup typo in renew_ipc
      - dns_worker_ipc_cleanup:
        sed -i "/_acme-challenge/ s/\\".*\\"/\\""/" ../named/ip.dat
        and
        cd /usr/local/ipc/certbot
```
